

- ① Carefully remove all components from the box.
- ② **NOTE: Bottom tier has legs with bends.** Each tier has three side panels. Install one side panel onto second side panel. Refer to **Figure A**. Install the third side panel to complete the basket. Refer to **Figure B**.
- ③ Repeat **Figure A** procedure until four baskets are built. **NOTE: Top tier has end caps.**

- ④ Install a middle tier assembly into the bottom tier assembly.
- ⑤ Install another middle tier assembly into the previous middle tier.
- ⑥ Install the top tier assembly into the middle tier assembly.
- ⑦ Slowly drop bottom grid into each of the 4 baskets.
