

LM Tag™ with SONR™

SONR™ technology integrates with LM Tag™ to push notifications to associates up to 20' away.

Features and Benefits

- ◆ Light and Motion sensor
- ◆ Small and Lightweight
- ◆ Effectively deters theft at the point of concealment
- ◆ Notifies store personnel on and off the floor of suspicious activity
- ◆ Alarm activation with:
 - Tag removal from package
 - Concealment time threshold met

Add additional layers of security to prevent theft

LM Tags are now available with SONR™ capabilities, providing an extra level of protection against theft with remote notification. LM Tags interface with the SONR™ Echobox (installed remotely) to relay product activity notifications to the Echobox - increasing awareness and response times!

The SONR™ notification can provide additional alerts to store staff or trigger existing store systems like video surveillance or communication devices.

To learn more about LM Tags and the SONR theft prevention systems, visit www.intelligentlossprevention.com

NOTE: Echobox sold separately.
