

# SONR™ Crossbar Shield

## Features and Benefits

- ◆ Protects an entire row of product facings
- ◆ Anti-sweep hook design
- ◆ Battery powered
- ◆ Easy to install
- ◆ Low profile to preserve retail space
- ◆ Multi-platform security

## Compatible with SONR™ Echo Box

The SONR™ Crossbar Shield is a new addition to the SONR™ product family. Designed to be a cost-effective solution to loss prevention in grocery, pharmacy, or convenience stores, the SONR™ Shield prevents sweep and theft for an entire row of facings on a shelf, open face gondola, or endcap. The SONR™ Shield's low profile design preserves space, ensuring retailers maximize valuable merchandising capacity.

In its default position, a product shield guards merchandise from sweep. Lifting the shield initiates a warning beep, notifying store associates of activity in the area while sending push-notifications to the SONR™ Echo Box. If the shield is lifted for too long, the system alarms for a predetermined period and resets with NO deactivation device required.
