

Ultra Slim Bus Bar for Under Shelf Lighting

Features and Benefits

- ◆ ETL Certified
- ◆ Low profile - easily installs into tight spaces behind gondola display shelves without requiring setup changes or tear-down
- ◆ Works with Molex and DC product outputs
- ◆ Works with all existing Allura LED Light Bars
- ◆ Cords with Integrated Connectors (24" long) reduce installation hardware and setup time
- ◆ Connector cords are magnetic for easy cable organization
- ◆ Only .25" thickness

Low profile power supply for under shelf lighting

Create effective light displays for store shelves to attract customers and increase sales. The Ultra Slim Bus Bar features a slim profile design, making installs and cable management much easier. Retrofit LED lighting into existing shelf systems (in either vertical or horizontal orientations).

The Ultra Slim Bus Bar connectors are integrated with cords, requiring no additional accessories (other than a power supply). Ultra Slim Bus Bars can power up to ten 4' Allura light bars. Magnetic connector cords ensure effective cable management and keep displays organized and product focused. Illuminate your merchandise and increase sales with the Ultra Slim Bus Bar today!
