

# Windmaster® Sign Frame with Rolling Base

PATENTED

9504360151

9504360161

## Features and Benefits

- ◆ Pairs easy mobility with superior durability and wind resistance for outdoor signs
- ◆ Springs flex to keep signs standing even in strong wind gusts
- ◆ Rolling base makes it simple to relocate signs, built in wheels engage when sign frame is tilted and disengage when sign frame is in upright position
- ◆ Base can be weighted with liquid or sand for additional stability
- ◆ Front-loading mitered sign frame rails snap open for easy sign placement
- ◆ Tool-free assembly; screw knobs hold frame securely to base

## Wind resistant for the outdoors

The sign frame protects signs and provides a professional presentation, while the stable rolling base makes it easy to relocate signs. Designed for outdoor and high-traffic areas, integrated springs flex to keep signs standing even in strong wind gusts.

## Specifications

### Double-sided framed style 9504360151

- Holds signs 28" W x 44" H, up to .030" thick; Rails are 1.75" W (visible area 25.4375" W x 41.4375" H)
